

GREEN[®] OPTIONS

Mulch marketed or distributed both in bags and in bulk in an unrestricted manner in all market sectors including domestic use, urban landscaping, agriculture, and land rehabilitation is required to meet the requirements of Australian Standard 4454:2012 Composts soil conditioners and mulches. Compliance with environmental protection and health regulations and guidelines are still required to be adhered to by mulch manufactures and distributors, whichever is more restrictive.

Our Processes

To minimise adverse impact to human health and the environment we require:

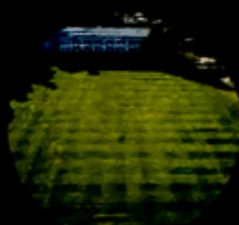

- *mulch suppliers are to adhere to AS 4454:2012 to minimise adverse impact on environmental and public health by requiring compliance with associated regulations and guidelines for health and safety,*
- *reviews of manufacturer's Safety Data Sheets are undertaken to understand the potentially hazardous nature of the product,*
- *our teams distribute mulch in appropriate wind and weather conditions,*
- *our teams wear appropriate PPE when handling mulch, and*
- *our teams do to not over-fill garden beds, as this may create projectiles when cutting grass in the future.*
